POSITIVE ENERGY FOR A POSITIVE FUTURE
YNNI POSITIF AR GYFER DYFODOL POSITIF

We'd like to hear your views

Green GEN Cymru is actively developing a robust and sustainable electricity network to support Wales' renewable energy future.

Mae Green GEN Cymru wrthi'n datblygu rhwydwaith trydan cadarn a chynaliadwy i gefnogi dyfodol ynni adnewyddadwy Cymru.

Green GEN Cymru's proposed Bryn Gilwern and Aberedw 132kV overhead lines, supported on wood poles, will connect Bute Energy's Bryn Gilwern and Aberedw Energy Parks, to a proposed new local distribution network.

Public consultation on our preferred routes

We've identified preferred routes and draft alignments, including indicative wood pole positions for the two connections. The proposed Bryn Gilwern connection is approximately 5 kilometres, and the Aberedw connection is just over 1 kilometre.

We're consulting on both projects at the same time, and we'd like to hear your views. Your input and detailed feedback will help us develop our proposals.

Our non-statutory consultation is open Wednesday 11 September to Wednesday 23 October 2024.
